This document is expressly provided to and solely for the use of ARUP on the NGN Arrival Hub, Low Thornley and takes into account their particular instructions and requirements. It must not be made available or copied or otherwise quoted or referred to in whole or in part in any way, including orally, to any other party without our express written permission and we accept no liability of whatsoever nature for any use by any other party.

**ARUP** 

#### 1.1 Project Introduction

This report provides a cost estimate for the Low Thornley Arrival Hub for Northern Gas Networks (NGN), including Cat A and Cat B costs for the building. The costs contained within this report for the Arrival Hub are based upon the RIBA Stage 2 Concept design information issued by ARUP and Napper Architects. Please note all of the adjacent enabling works and site infrastructure outside of the building boundary are excluded from this Cost Estimate as they are being developed in conjunction with the wider site masterplan.

This revision contains minor amendments as per comments from ARUP via email dated 25 July 2023.

The costs have been based upon the areas as defined in Appendix A, which confirms a Gross Internal Area of 1,185m2 (12,755ft2), with a net office space of 512m2 (43% of total area). A full list of information used to compile this budget estimate is included in Appendix C.

The measurements contained within this Cost Plan should not be relied upon for any purpose other than the formulation of the Cost Plan itself. The Cost Plan has been prepared solely for the use of ARUP and shall not be relied upon by any third party.

#### 1.2 Financial Overview

The RIBA Stage 2 Cost Plan total for the NGN Arrival Hub including Preliminaries, Overheads & Profit & Contingency are as follows:

<b>Total Building Costs</b>	£11,601,998	£9,791 /m2	£910 /ft2
rotar bananing coots	/00_//000		

A risk allowance of 3% is included in the above figure.

The broken down allowances for Category A and Category B fitout items as well as external works are as follows:

Office Category A	£7,082,393	£5,977 /m2	£555 /ft2
Office Category B	£1,330,202	£1,123 /m2	£104 /ft2
External Works	£3,189,403	£2,691 /m2	£250 /ft2

A breakdown of the items included in each Category is included in Appendix B.

All costs are based at current day 3rd quarter 2023 (3Q23), with a below the line adjustment applied for forecast future inflation to Q4 2025. See the commentary below in 1.3 for further commentary on inflation.

Turner & Townsend 3

#### 1.3 Inflation Forecast

This cost estimate has been produced with costs based at Q3 2023, with tender price inflation added to the perceived midpoint of construction in Q4 2025. The adjustment in this report has been made in accordance with the latest published BCIS indices.

Inflation forecasts still remain uncertain at the moment due to the potential looming recession and economic downturns. Demand is set to contract by 3.9 percent in 2023 according to the Construction Products Association. This is usually the biggest indicator for the direction of travel for prices. However, despite falling for only the second time in 27 months as of October 2022, the cost of construction materials and components is still a significant 44.0 percent higher than pre-COVID-19 levels. These elevated costs are likely to remain sticky while energy prices remain high.

Factors suggest that despite a potential recession, construction will most likely have to continue contending with an inflationary environment for now. While deflation may eventually materialise, clients and contractors need to be proactive in tackling cost pressures on a project-by-project basis depending on factors such as size, procurement route and market.

This will come down to getting the basics right: assessing risk at an early stage; dialling up productivity gains to increase efficiency; and strengthening close, agile relationships with supply chains through early engagement and closer ties. Together, these strategies can all help to mitigate the impact of inflation as recession begins to bite – both during and after.

#### **Section 2 - Basis of Costs**

#### 2 Basis of Costs

#### 2.1 Information used

A full list of all the information used to compile this Cost Plan is included in Appendix C.

#### 2.2 Assumptions

The full assumptions are as per the notes in the itemised breakdown cost plan in Appendix B, however key assumptions regarding scope are as follows:

#### General

Works are priced at current day 3Q2023 with tender price inflation forecast to the perceived midpoint of construction (Q4 2925).

The Cost Plan assumes that the works will be procured by competitive tender process. The tender will be on the basis of RIBA Stage 4 design or equivalent.

#### Substructure

Pile depths are assumed to be 10m as no detail has been provided.

Assume 1200x1200x600 pile caps to 600mm dia. piles

Piling mat is presumed to be 600mm deep and allowance for this to extend 10% past the building footprint has been allowed.

Retaining wall around perimeter - as no detail has been provided, it is assumed that the height varies from a minimum of 500mm to 4.5m high, therefore an average height of 3m has been used to calculate the area required.

#### Superstructure

Frame - Reinforcing to concrete members is assumed as follows: Concrete columns 225kg/m3; Slab 150kg/m3; Walls 150kg/m3

Steel - assumption of 75kg/m as no sizes provided for roof bracing

Assume 60min fire rating where not specified to frame and structural elements

Allowed for proprietary guided type fall restraint system in absence of detail

#### 42dB acoustic rating allowed for conference room doors

### **NGN Arrival Hub, Low Thornley, Gateshead**

Fire rated doors have been allowed for to conference rooms, stores, plant/comms rooms, corridor to office, control centre kitchen and access corridor (16 no. total). All other doors are non-fire rated.

Acoustic timber ceiling is allowed for as vertical slatted timber (larch) with acoustic treatment on Unistrut suspension system.

Raised access floor - presumed Kingspan RMG600 or similar - 250mm height

#### **Fittings, Furniture and Equipment**

All FF&E is based on the indicative layout shown on Napper architectural layout plans

#### **Services**

Loose IT equipment, telephones and digital sign in facilities are assumed to be provided by the occupier

All other items included and assumed specification is as per detailed cost breakdown in Appendix B.

#### **External Works**

Carpark asphalt - assumed buildup of 30mm surface course AC14; 70mm dense binder course AC20; 110mm dense base course AC32; 250mm Type 1 compacted fill; geotextile membrane

Sandstone paving slab - assume Yorkshire paviours

Slab paving to roof of conference suite; assume concrete paving with 30mm laying course

Soft landscaping incorporating trees and shrubs; assume 1 nr tee per 25m2 of area

Bollards assumed as Corten steel bollards with internal stainless steel sheet to spread integral LED light

#### 2.3 Exclusions

The following items are specifically excluded from the Cost Estimate:

- Gas utilities connections
- Sprinkler installation
- Dry riser system
- External lighting to roads, footpaths and architectural feature lighting, other than LED bollards to GF terrace
- All Professional and design team fees & legal costs
- Inflation beyond the current price date of 3Q23
- Project / design team fees
- Revenue/Operating costs (rent, rates, service charge, planned preventative maintenance)
- Compensation / costs associated with working on or above land in the possession of others
- Local Authority Fees and Charges
- Fees, Charges and or Commuted Sums associated with the Discharge of Section Agreements of the like

Client Confidential ARUP

### **NGN Arrival Hub, Low Thornley, Gateshead**

- VAT
- Acquisition / sales and marketing / compulsory purchase order or other client direct costs
- Service diversions / Off-site infrastructure upgrades / services reinforcement,
- Insurances (Including latent defects insurance)
- Legislation changes
- Party wall & rights to light consideration
- Site surveys [Including fees and investigations]
- Works outside site boundary
- Temporary uses / landscaping [e.g. car parking hire, hire of existing buildings for other uses and the like]
- Section 106 / CIL contributions
- Demolition and site remediation work
